WHY W9 - First Demo

Created by Jason Chan, Ashirvadh Bhupathi, David Joseph, Hojun Son, Josh Chopra, Jeurgen Beneitez, Justin Davis, Krisna Patel, Pavan Kunigiri, Ryan Van Duren
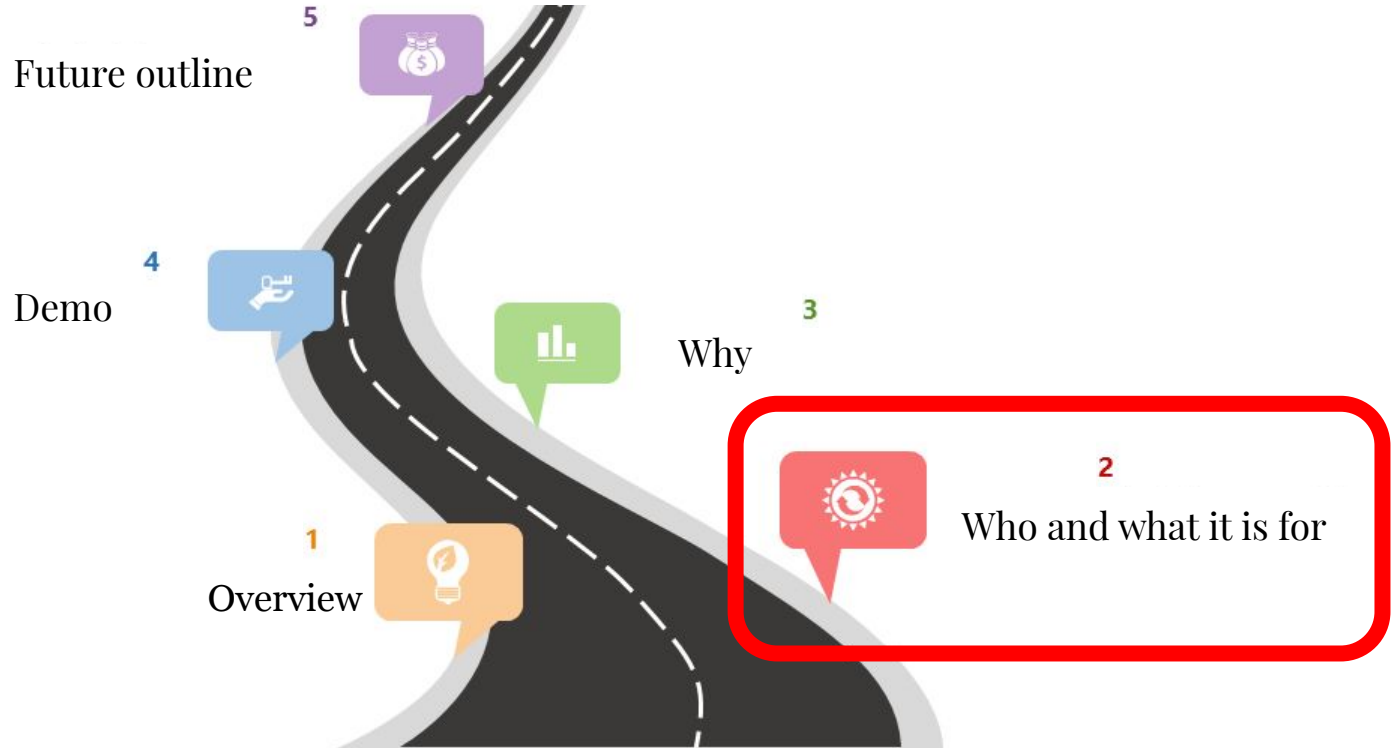

Presentation Roadmap

Overview

- W9 is an application capable of assisting restaurants with various needs
- Gives small restaurants a competitive advantage
- Implements synchronicity between employees
- Keeps customer informed, raises customer satisfaction
- Ease of scalability, growing restaurants can handle an influx of new customers easily

Presentation Roadmap
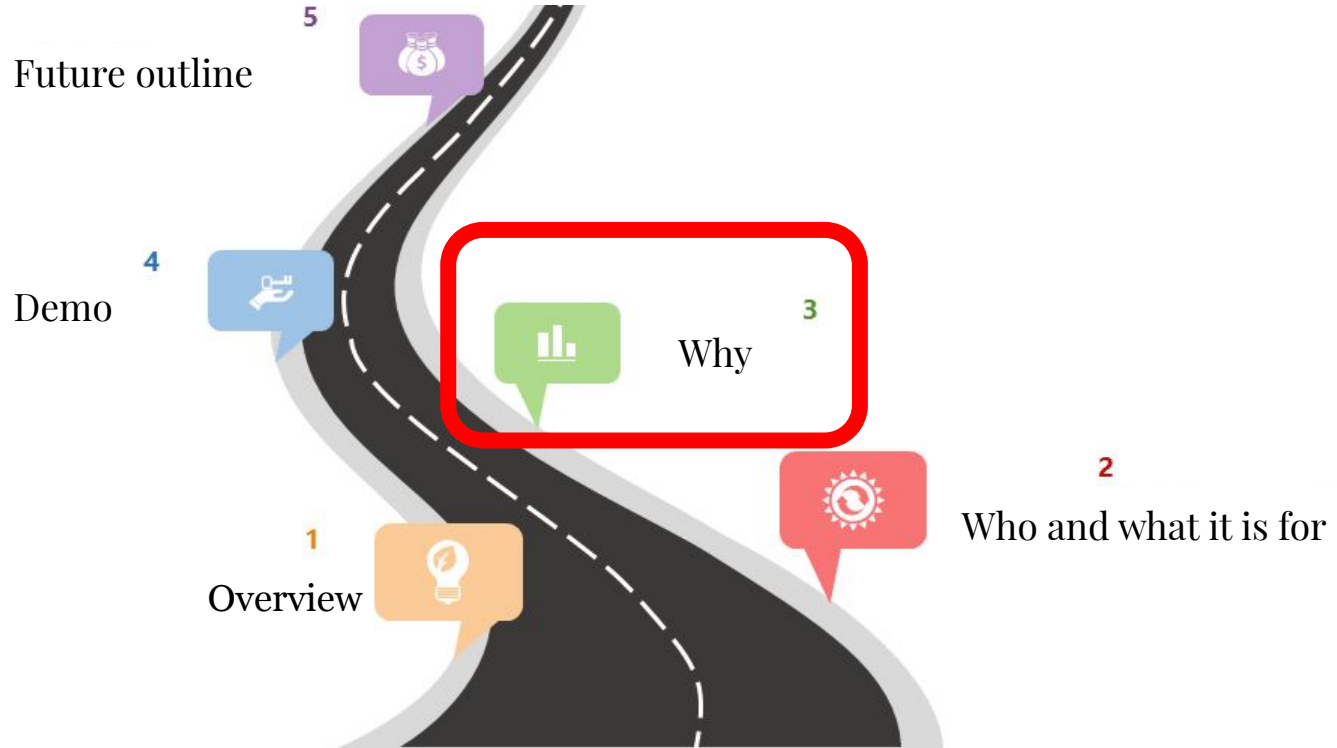

What is it for?

- The purpose of this application is to allow managers, customers, and employees the opportunity to efficiently interact seamlessly.
    - Customers: Access to things like wait time for tables and status of their orders. Also we be able to make mobile orders and make reservations.
    - Managers: Will have access to sales analysis meaning how often a certain item was ordered. See when employees check in and check out.
    - Employees: Will be alerted when the customers order is complete and ready.
- Overall, this application will lead to a simplification of a checkout process at a restaurant.

Who can Use the WHY W9?

- Customers - the customers of the Why Whine Just Dine would be able to :
    - Look at the menu, order and pay for their foods
    - Select whether to dine-in, takeout, or for delivery
    - Reserve for their table if they decide to dine-in
    - View their rewards accumulated from each payment
- Manager - the managers of the Why Whine Just Dine would be able to:
    - Manage employees, orders, and table status
    - Check analytics and inventory for each food
- Employees
    - Chef: track the current orders and view the menu
    - Driver: track the orders and available orders to deliver
    - Host/Waiter: manage orders, table status, and view the menu
    - All employees can sign-in and sign-out when they enter and exit from the Why Whine Just Dine
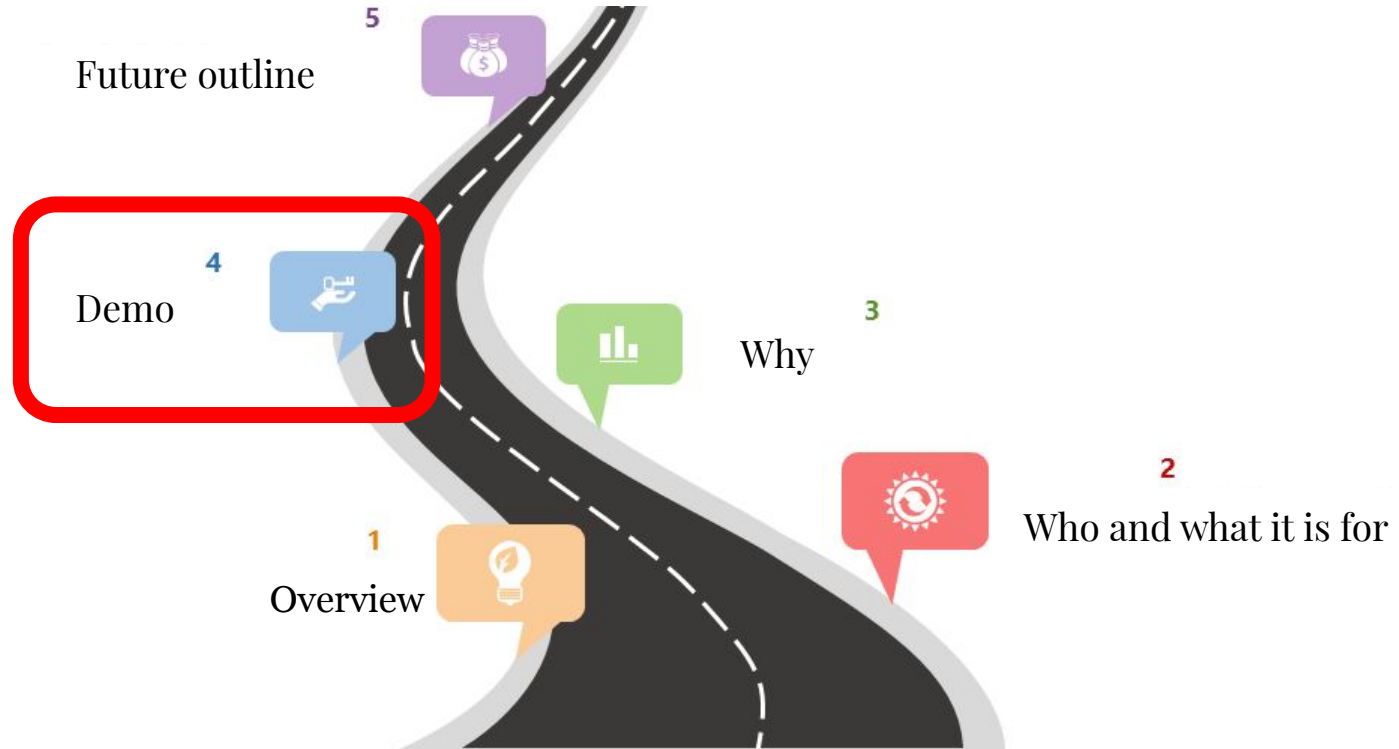

Presentation Roadmap
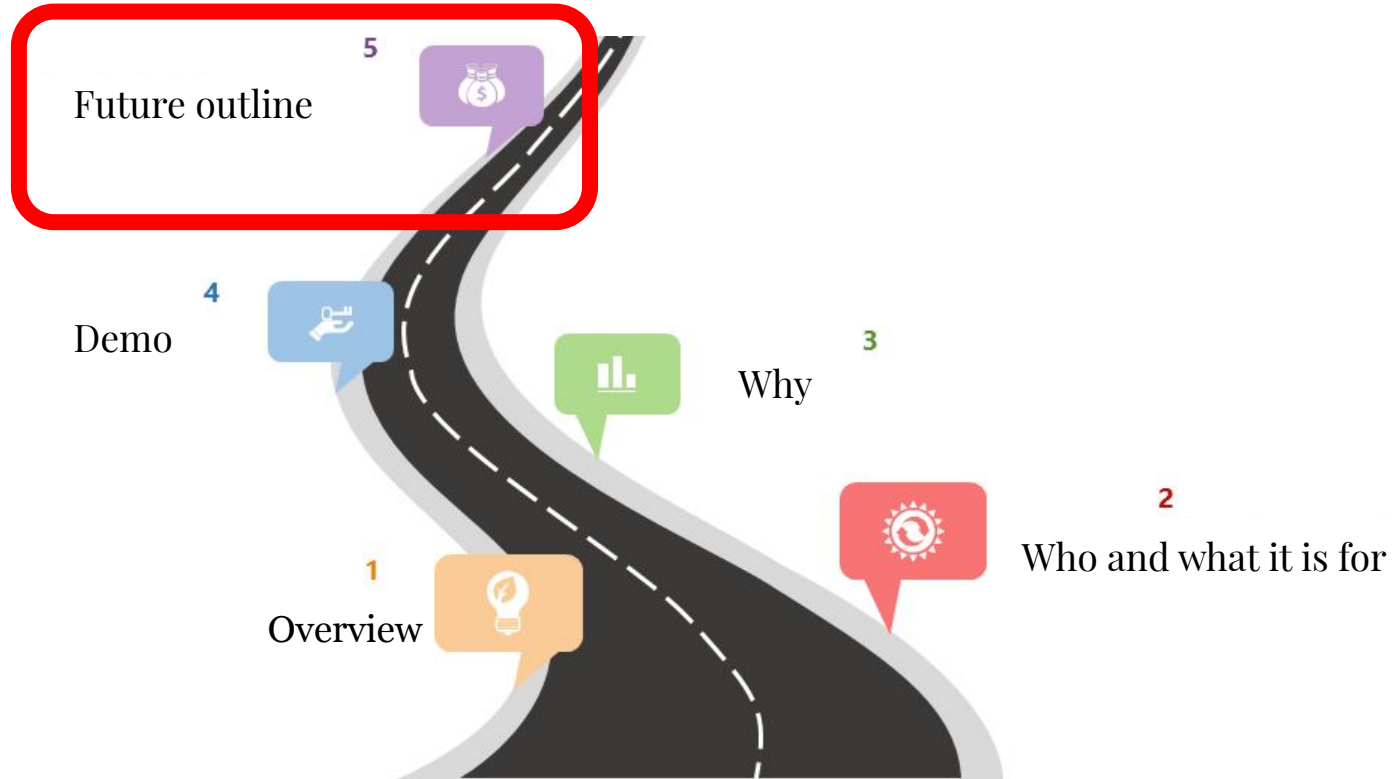

WHY WHY W9? (Pronounced "WHY WHINE")

WHY W9 is a modern solution to the service industry. It makes use of technology and user action to provide a host of new ways to solve real current problems. WHY W9 is the culmination of our efforts to solve these everyday restaurant problems. With our application, we aim to leave behind everyday restaurant problems.
